

Re-visioning Recycling by October 31st, 2021

The PRWMC is making positive and impactful changes to streamline the way we service recyclable materials. Some of these positive changes are as follows:

- One large bin available for all eligible recyclable materials
- Blue/clear bag to be used for all eligible recyclable materials
- Styrofoam can now be put inside blue/clear bag
- Cardboard separated, flattened, and placed in residential bunker
- Glass collection to be discontinued for now
- Future cleanups to be hosted by the TOPR. Additional information will be coming from the TOPR.
- Composting of leaves/grass and brush/branches available free of charge to our membership residents at our landfill, during regular operating hours.
- To allow for local charitable organizations and businesses to thrive, we will be closing the put-n-take
- To provide an optimized recycling experience we will be securing access to and monitoring the Eco Centre
